

Level 2 Certificate in Fire Risk Assessment

1 Day
Course

'Fire Risk Assessment Master class'

Business Scenario Effective and nationally recognised health and safety training in Fire Risk Assessment is essential in organisations today. None, or poor Fire Risk Assessment can lead to serious omissions in fire safety requirements and a greater possibility of fire. This could be a serious threat to the continuation of the organisation. This interactive one day session is designed to enable all parties to comply with their legal and moral duties

Who will Benefit? Any person required to carry out and review the Fire Risk Assessment for the organisation and required by law to be competent in this task on behalf to the person named in the organisation as the 'Responsible' Person.

Course Objectives By the end of the course you will be able to:

- Explain the reasons for conducting a Fire Risk Assessment and outline the requirements of fire safety law
- Outline the principles of the fire triangle and fire prevention and the common causes of fire
- Know the risk assessment approach in relation to fire
- Outline the competencies required of a Fire Risk Assessor and identify fire hazards within the workplace, those at risk and carry out, with the course leader, a Fire Risk Assessment
- Make recommendations for reducing risk and know how to record the finding and when to review them
